TECHNICAL FIELD SPECIFICATION • SMART ALARMS

How does the Ajax Hub 2 Plus maintain alert transmission during power cuts or severed internet cables?

BOTTOM LINE UP FRONT (BLUF) TRADE ASSESSMENT:
What happens to your home security if a burglar cuts your telephone line or flips your outside power mains? Most smart alarms go dead the moment household power or broadband fails.

1. Field Engineering & British Standards Analysis

In accordance with UK trade guidelines and Dual Micro-SIM 4G LTE:

What happens to your home security if a burglar cuts your telephone line or flips your outside power mains? I'm Gary Pearce from ADI Communications. Most smart alarms go dead the moment household power or broadband fails. The Ajax Hub 2 Plus incorporates four separate communication channels: gigabit Ethernet, Wi-Fi, and dual independent four-G cellular SIM cards, backed by a sixteen-hour lithium rechargeable battery. Even in a total blackout, emergency alerts reach your phone instantly. For fail-safe home protection in Yorkshire, speak to Gary on 07860 244 274.

2. Technical Benchmark Matrix

Specification Parameter	Standard / Budget Method	ADI Professional Trade Standard
Cabling Core	CCA (Copper Clad Aluminium)	100% Solid Bare Copper (23 AWG / WF100)
Structural Mount	Lightweight zinc standoffs	Pennine 90mph gale stainless lashing
Signal Alignment	Consumer bar indicators	Calibrated digital spectrum analyzer
Court Admissibility	Frequently rejected	100% BS EN compliant forensic evidence

3. Lead Engineer Craftsmanship & Citadel Links
