TECHNICAL FIELD SPECIFICATION • SMART ALARMS

How does the Ajax MotionCam Outdoor PhOD eliminate false alarm callouts with photo verification?

BOTTOM LINE UP FRONT (BLUF) TRADE ASSESSMENT:
Are you tired of outdoor alarm sirens waking the whole neighbourhood every time a fox or tree branch moves? Traditional PIR sensors trigger annoying false alarms from blowing foliage and animals.

1. Field Engineering & British Standards Analysis

In accordance with UK trade guidelines and Dual Independent PIRs:

Are you tired of outdoor alarm sirens waking the whole neighbourhood every time a fox or tree branch moves? I'm Gary Pearce from ADI Communications. Traditional PIR sensors trigger annoying false alarms from blowing foliage and animals. The Ajax MotionCam Outdoor uses two independent sensors and an intelligent heat algorithm. When movement is confirmed, it transmits an encrypted series of photos to your smartphone within nine seconds, letting you verify intruders instantly before calling police. For zero-false-alarm perimeter security, call Gary on 07860 244 274.

2. Technical Benchmark Matrix

Specification Parameter	Standard / Budget Method	ADI Professional Trade Standard
Cabling Core	CCA (Copper Clad Aluminium)	100% Solid Bare Copper (23 AWG / WF100)
Structural Mount	Lightweight zinc standoffs	Pennine 90mph gale stainless lashing
Signal Alignment	Consumer bar indicators	Calibrated digital spectrum analyzer
Court Admissibility	Frequently rejected	100% BS EN compliant forensic evidence

3. Lead Engineer Craftsmanship & Citadel Links
