TECHNICAL FIELD SPECIFICATION • SMART ALARMS

Can pets trigger Ajax PIR motion detectors inside modern open-plan living rooms?

BOTTOM LINE UP FRONT (BLUF) TRADE ASSESSMENT:
Do you have to lock your pets in the kitchen every time you set your home alarm system? Older alarm sensors trigger when a dog walks across the living room.

1. Field Engineering & British Standards Analysis

In accordance with UK trade guidelines and SmartDetect Algorithm:

Do you have to lock your pets in the kitchen every time you set your home alarm system? I'm Gary Pearce, lead security engineer at ADI Communications. Older alarm sensors trigger when a dog walks across the living room. Ajax MotionProtect sensors feature dual optics and the SmartDetect algorithm, which filters out animals under twenty kilograms and fifty centimetres tall. Your pets can wander freely while your home remains fully secured against human intruders. For pet-friendly smart security installations, contact Gary on 07860 244 274.

2. Technical Benchmark Matrix

Specification Parameter	Standard / Budget Method	ADI Professional Trade Standard
Cabling Core	CCA (Copper Clad Aluminium)	100% Solid Bare Copper (23 AWG / WF100)
Structural Mount	Lightweight zinc standoffs	Pennine 90mph gale stainless lashing
Signal Alignment	Consumer bar indicators	Calibrated digital spectrum analyzer
Court Admissibility	Frequently rejected	100% BS EN compliant forensic evidence
