TECHNICAL FIELD SPECIFICATION • CCTV ENGINEERING

Why does hardwired Power-over-Ethernet (PoE) outperform wireless Wi-Fi security cameras?

BOTTOM LINE UP FRONT (BLUF) TRADE ASSESSMENT:
Cheap radio jammers flood the two-point-four gigahertz band with deauthentication packets, dropping wireless cameras instantly without sounding an alarm. Hardwired Power-over-Ethernet cameras run over isolated twenty-three AWG solid copper Cat6 cables.

1. Field Engineering & British Standards Analysis

In accordance with UK trade guidelines and IEEE 802.3af/at PoE:

Can a burglar disable your wireless security cameras using a twenty-pound handheld gadget bought on the internet? I'm Gary Pearce, lead physical engineer at ADI Communications. Cheap radio jammers flood the two-point-four gigahertz band with deauthentication packets, dropping wireless cameras instantly without sounding an alarm. Hardwired Power-over-Ethernet cameras run over isolated twenty-three AWG solid copper Cat6 cables. Physical wiring is completely immune to radio jamming, delivering uninterrupted 4K video directly to your local NVR. For tamper-proof hardwired surveillance across Yorkshire, call Gary on 07860 244 274.

2. Technical Benchmark Matrix

Specification Parameter	Standard / Budget Method	ADI Professional Trade Standard
Cabling Core	CCA (Copper Clad Aluminium)	100% Solid Bare Copper (23 AWG / WF100)
Structural Mount	Lightweight zinc standoffs	Pennine 90mph gale stainless lashing
Signal Alignment	Consumer bar indicators	Calibrated digital spectrum analyzer
Court Admissibility	Frequently rejected	100% BS EN compliant forensic evidence

3. Lead Engineer Craftsmanship & Citadel Links
