TECHNICAL FIELD SPECIFICATION • SATELLITE TELECOMS

How do you bypass the Starlink Gen 3 / Mini router into a whole-home gigabit Wi-Fi 7 mesh network?

BOTTOM LINE UP FRONT (BLUF) TRADE ASSESSMENT:
Is the standard Starlink router failing to push fast Wi-Fi through thick UK stone cavity walls? The factory Starlink router lacks the range and VLAN features required for modern smart homes.

1. Field Engineering & British Standards Analysis

In accordance with UK trade guidelines and Bypass Mode:

Is the standard Starlink router failing to push fast Wi-Fi through thick UK stone cavity walls? I'm Gary Pearce, lead engineer at ADI Communications. The factory Starlink router lacks the range and VLAN features required for modern smart homes. We configure the official router into Bypass Mode, routing the gigabit ethernet port into an enterprise gateway and commercial Wi-Fi 7 access points. This eliminates double NAT issues and provides seamless roaming across your entire property. To get full Starlink speed in every room, call Gary on 07860 244 274.

2. Technical Benchmark Matrix

Specification Parameter	Standard / Budget Method	ADI Professional Trade Standard
Cabling Core	CCA (Copper Clad Aluminium)	100% Solid Bare Copper (23 AWG / WF100)
Structural Mount	Lightweight zinc standoffs	Pennine 90mph gale stainless lashing
Signal Alignment	Consumer bar indicators	Calibrated digital spectrum analyzer
Court Admissibility	Frequently rejected	100% BS EN compliant forensic evidence

3. Lead Engineer Craftsmanship & Citadel Links
