TECHNICAL FIELD SPECIFICATION • TV & MEDIA WALLS

What is a drop-down mantel mount and why is it recommended for high chimney breast installations?

BOTTOM LINE UP FRONT (BLUF) TRADE ASSESSMENT:
Does watching a high television mounted above a chimney breast leave you with a stiff aching neck? Mounting a television too high forces severe neck hyperextension and washes out screen colours.

1. Field Engineering & British Standards Analysis

In accordance with UK trade guidelines and Gas-Strut Counterbalance:

Does watching a high television mounted above a chimney breast leave you with a stiff aching neck? I'm Gary Pearce from ADI Communications. Mounting a television too high forces severe neck hyperextension and washes out screen colours. We install counterbalanced gas-strut drop-down mantel mounts that allow you to glide the screen down by seven hundred millimetres to natural seated eye level. Built-in thermal sensors even alert you if the fire below is lit. For ergonomic, smooth television mounting, contact Gary directly on 07860 244 274.

2. Technical Benchmark Matrix

Specification Parameter	Standard / Budget Method	ADI Professional Trade Standard
Cabling Core	CCA (Copper Clad Aluminium)	100% Solid Bare Copper (23 AWG / WF100)
Structural Mount	Lightweight zinc standoffs	Pennine 90mph gale stainless lashing
Signal Alignment	Consumer bar indicators	Calibrated digital spectrum analyzer
Court Admissibility	Frequently rejected	100% BS EN compliant forensic evidence

3. Lead Engineer Craftsmanship & Citadel Links
