TECHNICAL FIELD SPECIFICATION • TV & MEDIA WALLS

Can you safely mount a heavy 65-inch or 75-inch TV onto dot-and-dab plasterboard above a fireplace?

BOTTOM LINE UP FRONT (BLUF) TRADE ASSESSMENT:
In modern UK homes, plasterboard sits on adhesive dabs, leaving a twenty millimetre hollow gap before the blockwork. Tightening standard plugs crushes the drywall, causing brackets to pull out.

1. Field Engineering & British Standards Analysis

In accordance with UK trade guidelines and CoreFix 100 Anchors:

Why do standard plastic wall plugs fail when securing large televisions to dot-and-dab plasterboard? I'm Gary Pearce, lead engineer at ADI Communications, backed by ten million pounds public liability insurance. In modern UK homes, plasterboard sits on adhesive dabs, leaving a twenty millimetre hollow gap before the blockwork. Tightening standard plugs crushes the drywall, causing brackets to pull out. We install heavy-duty CoreFix steel-bridging anchors that transfer one hundred percent of the television's weight directly into the solid masonry. For rock-solid television mounting, call Gary on 07860 244 274.

2. Technical Benchmark Matrix

Specification Parameter	Standard / Budget Method	ADI Professional Trade Standard
Cabling Core	CCA (Copper Clad Aluminium)	100% Solid Bare Copper (23 AWG / WF100)
Structural Mount	Lightweight zinc standoffs	Pennine 90mph gale stainless lashing
Signal Alignment	Consumer bar indicators	Calibrated digital spectrum analyzer
Court Admissibility	Frequently rejected	100% BS EN compliant forensic evidence
