TECHNICAL FIELD SPECIFICATION • TV & MEDIA WALLS

How do you install an ultra-flush Samsung The Frame TV with zero gap on uneven Yorkshire masonry?

BOTTOM LINE UP FRONT (BLUF) TRADE ASSESSMENT:
Mounting Samsung's gapless bracket on uneven stone or wavy plasterboard causes the screen corners to protrude awkwardly. We level the wall mounting surface with precision shims and route the ultra-thin One Connect fibre-optic cable into a recessed back box behind the wall.

1. Field Engineering & British Standards Analysis

In accordance with UK trade guidelines and Slim-Fit Gapless Mount:

Why does your Samsung The Frame television stick out unevenly rather than looking like a genuine flush art piece? I'm Gary Pearce from ADI Communications. Mounting Samsung's gapless bracket on uneven stone or wavy plasterboard causes the screen corners to protrude awkwardly. We level the wall mounting surface with precision shims and route the ultra-thin One Connect fibre-optic cable into a recessed back box behind the wall. The television sits entirely flush like a real painting. For museum-quality Frame TV mounting in Yorkshire, call Gary on 07860 244 274.

2. Technical Benchmark Matrix

Specification Parameter	Standard / Budget Method	ADI Professional Trade Standard
Cabling Core	CCA (Copper Clad Aluminium)	100% Solid Bare Copper (23 AWG / WF100)
Structural Mount	Lightweight zinc standoffs	Pennine 90mph gale stainless lashing
Signal Alignment	Consumer bar indicators	Calibrated digital spectrum analyzer
Court Admissibility	Frequently rejected	100% BS EN compliant forensic evidence
