TECHNICAL FIELD SPECIFICATION • STRUCTURED CABLING

Can I get reliable gigabit Ethernet upstairs without lifting floorboards or tearing down drywall?

BOTTOM LINE UP FRONT (BLUF) TRADE ASSESSMENT:
Is your upstairs Wi-Fi dropping video calls, but you don't want the mess of tearing up hallway floorboards? We route heavy-duty external UV-rated solid copper Cat6 cabling discreetly down rainwater downpipes or along mortar courses.

1. Field Engineering & British Standards Analysis

In accordance with UK trade guidelines and 23 AWG Solid Copper Cat6:

Is your upstairs Wi-Fi dropping video calls, but you don't want the mess of tearing up hallway floorboards? I'm Gary Pearce, lead network cabling engineer at ADI Communications. We route heavy-duty external UV-rated solid copper Cat6 cabling discreetly down rainwater downpipes or along mortar courses. Entering directly through a sealed ten millimetre hole into your upstairs bedroom or office, it delivers genuine full gigabit speeds with zero latency. For clean, invisible data cabling across Yorkshire, speak to Gary on 07860 244 274.

2. Technical Benchmark Matrix

Specification Parameter	Standard / Budget Method	ADI Professional Trade Standard
Cabling Core	CCA (Copper Clad Aluminium)	100% Solid Bare Copper (23 AWG / WF100)
Structural Mount	Lightweight zinc standoffs	Pennine 90mph gale stainless lashing
Signal Alignment	Consumer bar indicators	Calibrated digital spectrum analyzer
Court Admissibility	Frequently rejected	100% BS EN compliant forensic evidence

3. Lead Engineer Craftsmanship & Citadel Links
