TECHNICAL FIELD SPECIFICATION • STRUCTURED CABLING

Can Cat6 cable safely be run outside on an exterior brick wall in the UK climate?

BOTTOM LINE UP FRONT (BLUF) TRADE ASSESSMENT:
Will running ordinary ethernet cable along an outside brick wall cause connection drops during cold winter months? Indoor PVC-jacketed data cable degrades under ultraviolet sunlight and cracks in sub-zero frost, allowing moisture into the copper pairs.

1. Field Engineering & British Standards Analysis

In accordance with UK trade guidelines and External HDPE Jacket:

Will running ordinary ethernet cable along an outside brick wall cause connection drops during cold winter months? I'm Gary Pearce from ADI Communications. Indoor PVC-jacketed data cable degrades under ultraviolet sunlight and cracks in sub-zero frost, allowing moisture into the copper pairs. We strictly install external-grade solid copper Cat6 featuring high-density polyethylene UV-proof jackets. Fitted with proper masonry clips and drip loops, it lasts for decades in all weather. For robust outdoor data cabling, call Gary on 07860 244 274.

2. Technical Benchmark Matrix

Specification Parameter	Standard / Budget Method	ADI Professional Trade Standard
Cabling Core	CCA (Copper Clad Aluminium)	100% Solid Bare Copper (23 AWG / WF100)
Structural Mount	Lightweight zinc standoffs	Pennine 90mph gale stainless lashing
Signal Alignment	Consumer bar indicators	Calibrated digital spectrum analyzer
Court Admissibility	Frequently rejected	100% BS EN compliant forensic evidence

3. Lead Engineer Craftsmanship & Citadel Links
