TECHNICAL FIELD SPECIFICATION • STRUCTURED CABLING

What is MoCA and can it be used with UK television coaxial cables for multi-gigabit speeds?

BOTTOM LINE UP FRONT (BLUF) TRADE ASSESSMENT:
Can you turn unused television aerial and Sky coaxial cables into ultra-fast two-point-five gigabit computer networks? MoCA adapters convert existing high-grade seventy-five ohm WF100 coaxial wiring into ultra-fast ethernet pipes without drilling new holes.

1. Field Engineering & British Standards Analysis

In accordance with UK trade guidelines and MoCA 2.5 Specification:

Can you turn unused television aerial and Sky coaxial cables into ultra-fast two-point-five gigabit computer networks? I'm Gary Pearce, lead telecoms specialist at ADI Communications. MoCA adapters convert existing high-grade seventy-five ohm WF100 coaxial wiring into ultra-fast ethernet pipes without drilling new holes. With speeds reaching two-point-five gigabits and ping under three milliseconds, it performs almost as fast as dedicated fibre. We test and re-terminate coaxial points for rock-solid stability. For smart home network upgrades in Yorkshire, contact Gary on 07860 244 274.

2. Technical Benchmark Matrix

Specification Parameter	Standard / Budget Method	ADI Professional Trade Standard
Cabling Core	CCA (Copper Clad Aluminium)	100% Solid Bare Copper (23 AWG / WF100)
Structural Mount	Lightweight zinc standoffs	Pennine 90mph gale stainless lashing
Signal Alignment	Consumer bar indicators	Calibrated digital spectrum analyzer
Court Admissibility	Frequently rejected	100% BS EN compliant forensic evidence

3. Lead Engineer Craftsmanship & Citadel Links
